A Day in My Life

I wake up at 7 a.m. every day. My sister Helen and I get up and wash. She always takes a long time, so I have to wait for her. Then we have breakfast.

We live in the north of Canada. It is usually very cold and often snows. We put on boots and big coats. My sister does not like to walk. She usually sits on a sled^①, and I pull her.

Our school is near our house. We always hurry inside. We soon feel warm, because the school has got good heaters. Then the first lesson starts. Our school does not have many students, just about 20. Our teacher often uses a computer to teach us.

My sister usually goes home after school, but I play outside for some time with my friends. Our favourite game is ice hockey^②.

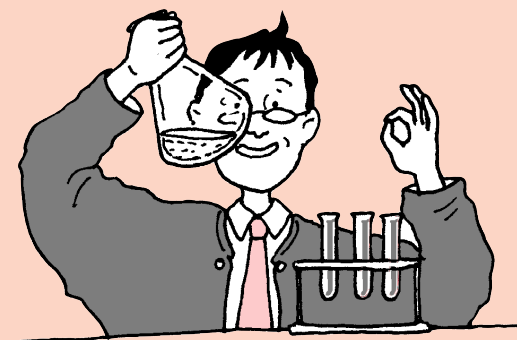

We have dinner at six o'clock. My sister and I do our homework and watch television until 9.30 p.m. Then my sister goes to bed, but I often play chess with my dad for half an hour and go to bed at 10 p.m.

B Read what Mary says about her family and choose the best answers.

My family is very unusual. We are different from most families.

My father is a scientist. He works in a laboratory. He does experiments all day. He doesn't take the underground to work. Instead, he walks ten kilometres every day. He daydreams a lot, so he doesn't talk very much.

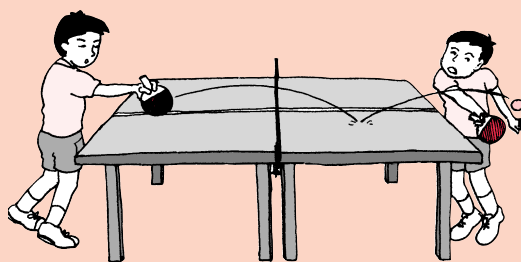

① sled n. 雪橇 ② ice hockey n. 冰上曲棍球

My mother is a pilot for Pacific Airlines. She has a special uniform. She goes to different countries about three days a week. She enjoys her work, but she doesn't like getting up early. Sometimes she has to get up at four o'clock in the morning. I like to listen to her stories about different countries' customs^①.

My older brother Dean is very different from me. He really likes sport, but I don't like it very much. He often practises table tennis in the late afternoon. Sometimes he and his classmates play in table tennis matches. He usually wins his matches.

- 1 Mary thinks her family is _____ most families.

Reading

Read Roy's diary and choose the correct answers.

12 November

Last night, I went to bed at 10 o'clock. I was soon asleep. In the middle of the night, I woke up. It was very dark, but I could hear someone in my room. Then I saw a person. He, or she, very quietly walked across my room and came near my bed. Was it a thief? I was not very brave and I quickly closed my eyes. One minute later, the person walked quietly out of my room. I was very afraid! I couldn't fall asleep again.

In the morning, the sun shone into my room. I got up and hurried to my mum's room. I told her everything. She laughed. 'Don't you know what day it is today?' she asked. 'Go back to your room and have a look.'

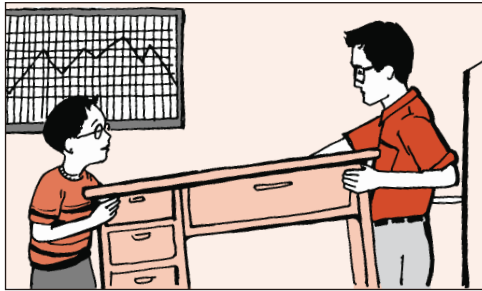

I went back to my room and then I saw it! On the floor, there was a beautiful, new school bag. In the bag, there was a card with 'Happy Birthday!' on it.

And then I realized! There wasn't a thief last night! It was my mum, and today is my birthday!

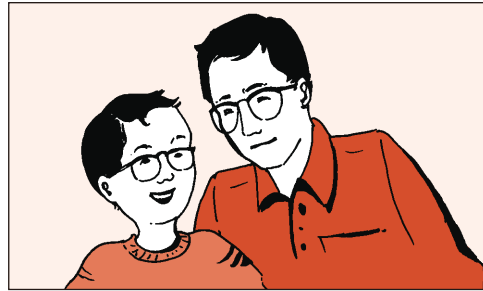

- 1 When did Roy go to bed last night?
a At 9.30. b At 10. c At 12.
- 2 What did Roy do when he saw a person in his room?
a He got up and talked to the person.
b He quickly closed his eyes.
c He hurried to his mum's room.
- 3 What did the person do after that?
a The person walked loudly across the floor.
b The person walked quietly out of Roy's room.
c The person talked quietly to Roy.
- 4 What day was 12 November?
a It was Roy's birthday.
b It was his mum's birthday.
c It was his dad's birthday.
- 5 Who actually entered Roy's room last night?
a A thief. b Roy's mum. c Roy's dad.

Reading

A Read about the invention and development of clocks and watches and complete the table. You must do some calculations to get all the information.

Clocks and watches

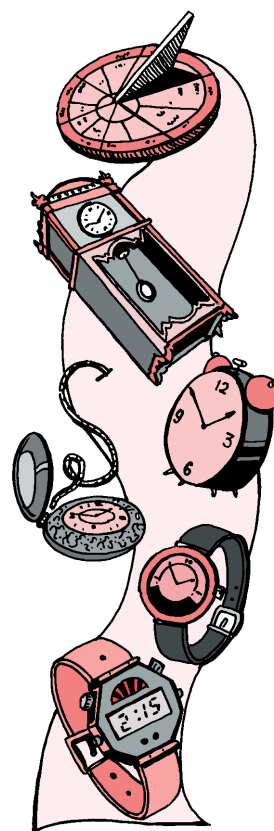

Nowadays, we can calculate time very accurately, but before the invention of clocks, it was very difficult to do that. One way people told the time was by using sundials^①, but it was still impossible to tell the time on cloudy days or at night.

The first mechanical clock was invented in China by Su Song in 1088. The first clock in Europe was invented 195 years later, at the end of the 13th century, in Britain. The alarm clock was invented in Germany 67 years later.

The first watch was invented in Italy in 1462. The early watches were different from today's in two main ways. First, they only had an hour hand. Second, people could not wear them on their wrists. People had to keep them in their pockets—that is why the early watches were called 'pocket watches'.

The first wrist watches came from Switzerland 328 years after the first pocket watches, but nobody bought them. They did not become popular until a hundred years later.

Digital clocks and watches came from the United States and are the newest invention in time-keeping. Shops all over the world started to sell them in 1971.

Simon and Henry are talking about **The New Guinness Book of Records**. Read their dialogue and then decide whether the statements are true or false. Circle **T** or **F**.

Henry: Hi, Simon. Is that the book your parents gave you?

Simon: Yes. It's great. It's called *The New Guinness Book of Records*. It tells you about all kinds of records. You know, things like the world's tallest man, the fastest car, and so on.

Henry: It sounds very interesting.

Simon: Look. This man has the longest beard^① in the world. It's 5.33 metres!

Henry: Wow! And look at this man with the long nails^②. He hasn't cut his fingernails since 1952, and the longest one is now 1.4 metres!

Simon: It's full of information. What do you want to know?

Henry: What is the most dangerous animal in the world? I bet it's a shark.

Simon: I don't think so. Let's check the contents page. There's a section on 'Dangerous Killers' ... Let's see. It's the mosquito^③! It says that mosquitoes are probably responsible for about half of all human deaths in history, except for wars.

Henry: Wow! I didn't realize they were so dangerous. It's funny, because we usually think about big animals, like sharks or tigers ...

Simon: Yes, but the little things carry a lot of germs^④. They could be the worst. Rats^⑤ are bad too. Look—rats once carried a disease called the Black Death. It killed about 25 million people in Europe.

Henry: What! He must be crazy!

Simon: And there are some funny things on this page. An Indian man balanced on one foot for over 71 hours. And look at this one. 15 members of a karate^① club in Canada knocked down a house in 3 hours, 6 minutes and 50 seconds, using only their hands and feet.

Henry: Why do people do things like that?

Simon: I think they just want to get into this book, so they'll become famous.

Henry: Well, may I borrow the book from you?

Simon: Sure.

Reading

Read the passage about Gary Wood and Colin Wright and decide whether the following statements are true or false. Circle **T** or **F**.

Gary Wood and Colin Wright were on a road near Edinburgh, Scotland. They were driving to their friend's house. Suddenly, about six metres above the ground in front of them, they saw a spaceship. It was about ten to twelve metres across.

From that point on, Gary and Colin remembered very little. But later, they did remember three aliens. They came towards the car. Gary and Colin both felt a lot of pain.

Then they remembered being in a room with an alien. The alien did not speak but a voice came into their ears. The voice said, 'I have a life like yours.' 'The aliens looked into my life,' Gary said. 'They could understand everything.'

Gary and Colin were both very afraid at that time. Colin will not talk about his experience but Gary will. Gary wants to learn more about aliens. He has his own website on the Internet. 'I know something is going to happen,' he says. 'The aliens will come back here soon.'

- 1 Gary Wood and Colin Wright were going to a friend's house. T / F
- 2 They suddenly saw a spaceship right behind their car. T / F
- 3 They felt nothing when the aliens came towards the car. T / F
- 4 The aliens did not speak but Gary and Colin could hear a voice. T / F

Reading

A Read the passage and correct the mistakes in the following sentences. The first one has been done for you.

We have interviewed two people, Mike and Jerry.

Mike always wanted to be an astronaut:

'When I was five I told my mother, "I'm going to be an astronaut." I practised by jumping off chairs and trying to fly! Later I said to myself, "I'm going to study at university, and then I'm going to learn how to fly." And that's what I did. I'm really very lucky to be an astronaut. Hundreds of people try, but only a few are successful.'

Jerry talks about living in space:

'When you first go up into space you may get sick for a few days, but then you get used to it. There is no gravity in space and so you are weightless. It's fun to float around inside the spaceship. But your body starts to change: your bones and muscles get weaker. You have to do a lot of exercise every day to keep your bones and muscles strong. That can be very boring. The food is not very interesting either. On my last flight, we ran out of chocolate, and I really wanted some!'

1 Mike told his mother of his ambition when he was six years old.

six → five

2 Mike learnt how to fly before he studied at university.

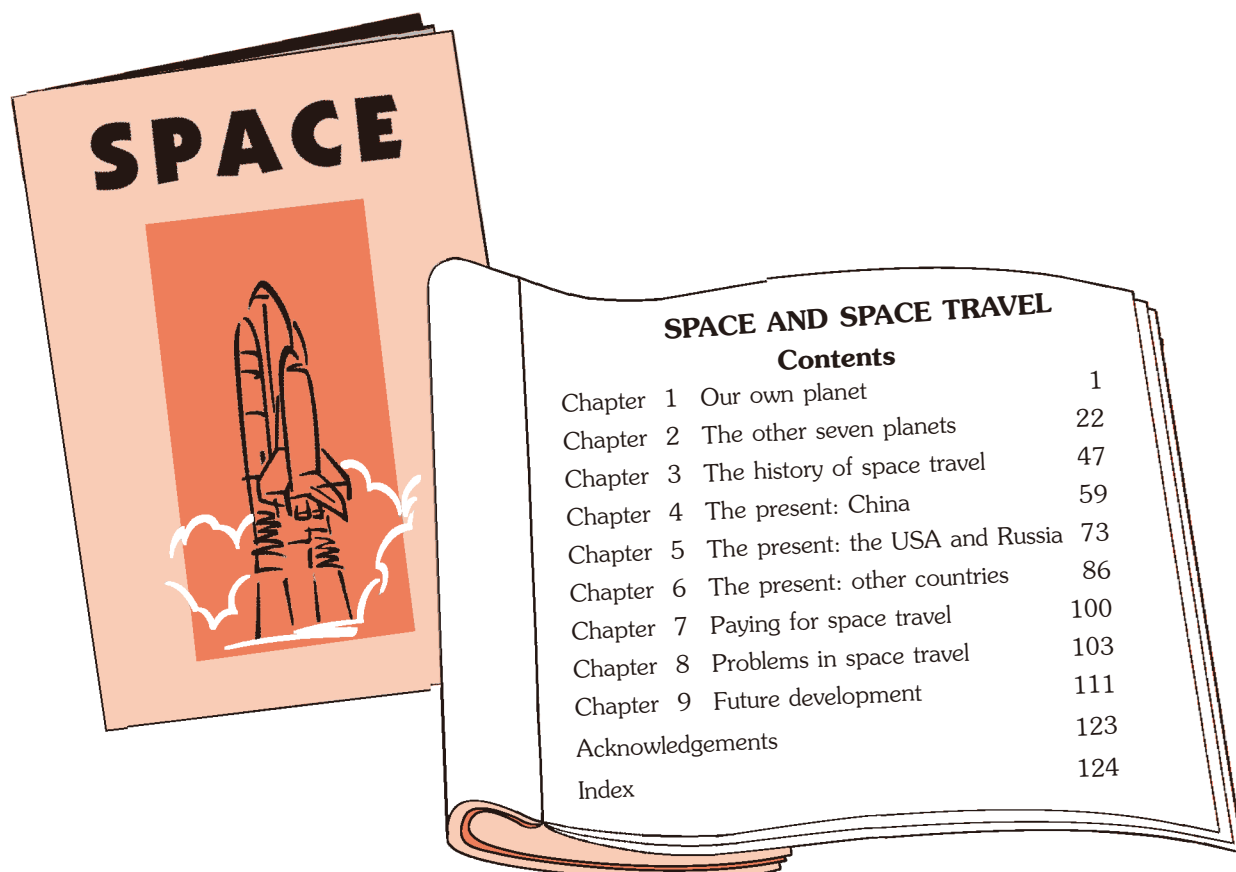

3 Hundreds of people become astronauts.

4 It is boring to float around inside the spaceship.

5 People's bones and muscles get stronger when they are in space.

6 Jerry really wanted some bread on his last flight.

B You need some information about space and space travel for a school project, so you borrowed a book from the library. Look at the contents page of the book below and read the list of eight things that you need to find out about. For each one, write down the number of the chapter that will probably contain the information. (You can use the same chapter more than once.)

To find out about ...

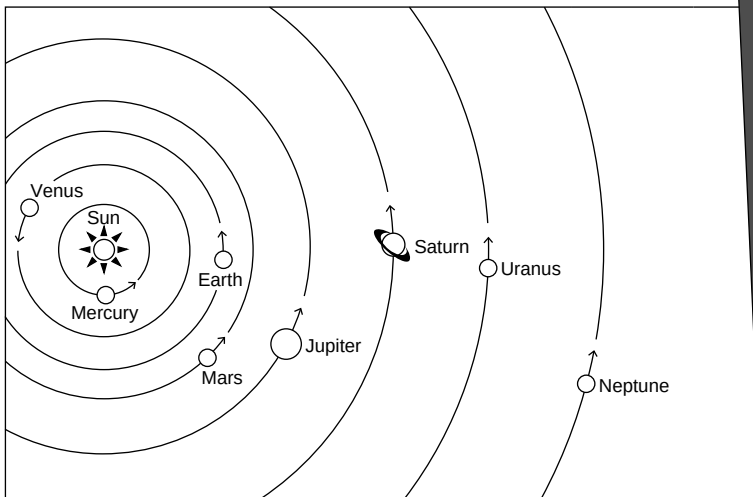

- a** the first men to land on the Moon in 1969
- b** the space programme in China
- c** the planet Mercury
- d** space travel in 2050
- e** what space travellers should do when they are sick
- f** the space programme in Japan
- g** the Earth
- h** when the first woman will land on the Moon
